

Sliding Door Installation

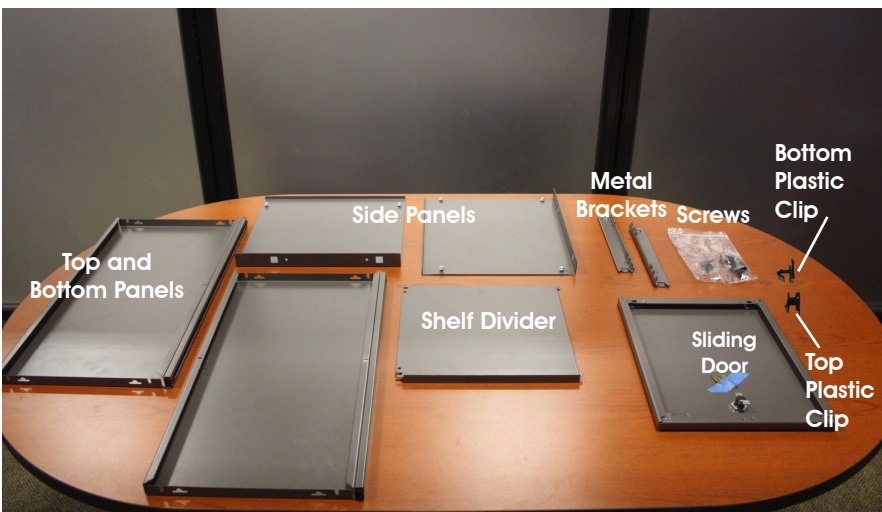

Assembly Time:

Approximately 10 minutes

Tools Needed:

- 9mm Wrench
- Phillips Screwdriver

Remove the parts from the box and verify they are all there.

STEPS 1 & 2

Place the metal brackets into the slot channels.

Attach the side panels onto the bracket hooks. When putting on the side panels, make sure the top is flush with the panel.

STEPS 3 & 4

Using the screws provided, secure the side panels.

Place the bottom panel onto the nuts already on the side panels. If the bottom panel is not going on easily, then loosen the nuts.

STEPS 5 & 6

Tighten nuts on the bottom using your 9mm wrench.

Place the shelf divider with the tabs on the bottom in the provided grooves.

STEPS 7 & 8

Place the top panel onto the nuts already on the side of the panels. Loosen nuts if the top panel does not go on easily.

Tighten the nuts on the top using your 9mm wrench.

STEP 9

Assemble the door using the plastic clips.

The 2 hooked clips clip onto the bottom and the 2 straight clips go into the top.

STEP 10

Push the door into the grooves on the top and bottom panels until you hear them click into place.
